PROFESSIONAL SUMMARY

Entry-level gameplay and technical designer with an associate degree and ongoing bachelor's studies at Full Sail University. Builds and debugs gameplay systems in Unreal Engine 5 using Blueprint visual scripting, including NPC state machines, interactive puzzle mechanics, and complete arcade gameplay loops. Brings technical problem-solving, careful testing, and dependable professional experience.

TECHNICAL SKILLS

Unreal Engine 5 • Blueprint Visual Scripting • AI State Machines & Navigation • Gameplay Mechanics • Event-Driven Logic • UI/HUD • Debugging & Playtesting • Git/GitHub • Perforce • Figma • MATLAB

SELECTED GAME DEVELOPMENT PROJECTS

NPC AI & State Machine System (Sneaky Sneaky) | Unreal Engine 5, Blueprints

- Extended a course-provided state-machine framework into a stealth prototype with independently controlled guards, AI perception, patrol, pursuit, pause, reverse, and alarm behaviors.
- Built array-based guard selection and individual runtime commands with validation and visual state feedback.
- Independently designed room-based detection boundaries to end pursuit when the player leaves an assigned encounter area.

Modular Tile-Based Puzzle System | Unreal Engine 5, Blueprints

- Extended a course-provided puzzle foundation with contextual message tiles, dynamic water hazards, chained force tiles, and teleportation mechanics.
- Created an Editor Utility Widget to streamline tile selection; tested interactions among player movement, hazards, and puzzle objects.

Asteroids Arcade Prototype | Unreal Engine 5, Blueprints

- Implemented wave progression, randomized asteroid spawning, asteroid splitting, score tracking, and shooting within a course-provided framework.
- Integrated player death/respawn, invulnerability, HUD updates, pause, countdowns, and game-over/restart flow.

EDUCATION

Full Sail University | A.A.S., Game Development | September 2026

Full Sail University | B.S., Interactive Technology (GDN Concentration) | Expected September 2027

PROFESSIONAL EXPERIENCE

Diesel Truck Parts | Short Block Engine Builder | February 2026–Present

- Assemble engine components using detailed procedures, precision measurements, and quality checks.
- Troubleshoot assembly issues and coordinate work to maintain accuracy and production flow.
